TRIVOREX® Neutralizing absorbent in powder form

Eliminates the chemical risk through neutralization

Indicates when the hazard is eliminated through a colour indicator

Stops vapour emissions

Leaves a dry, non-slippery floor

Cost effective waste removal

Efficient against hydrofluoric acid

Non-hazardous for humans and the environment

Time saving

- ✔ Versatile amphoteric chemical neutralizer
- ✔ Can be used on all chemicals
- ✔ Controlled neutralizing reaction
- ✔ Colour indicator

Waste declassification

The Trivorex® absorbent enables certain corrosive chemicals to be converted into non-hazardous waste (NHW) in accordance with EU waste regulation no. 1357/2014.

- ✔ Reduces waste treatment costs
- ✔ Reduces regulatory constraints while respecting them

Now that your floors are decontaminated, you can also extend the lifespan of your machines and even your walls
